Digital Mohalla — DFD level 0: context diagram (Gane & Sarson; design step A10, Student 2, v1.2)

Gane & Sarson notation. Dark square = external entity; rounded box = process (number above the line); arrow = data flow. A context diagram has one process and no data stores: the stores D1–D5 belong to level 1.
Privacy. No flow on this diagram carries a location: a borrowing request has none (A11, decision D13).
